

PRESS RELEASE

infoteam infoteam Software Group joins the VDB

infoteam Software Group is pleased to announce that the Executive Committee of the German Railway Industry Association (VDB) approved its membership at the beginning of June. This step marks a significant milestone for the infoteam Software Group and underlines its commitment to innovation and excellence in the railway industry.

Bubenreuth, 18th of July 2024

- Expertise and comprehensive know-how in software solutions for the railway industry
- Digitalisation is a key aspect for the future of the rail industry

Membership of the VDB offers the infoteam Software Group the opportunity to contribute its expertise and comprehensive know-how in software development to the railway industry in a targeted manner. By working closely with other member companies and participating in important industry initiatives, infoteam can provide customised solutions and state-of-the-art technologies that meet the high demands of the rail industry.

Focus on efficiency, safety and sustainability

Digitalisation, in future also with the support of AI, is a key aspect for the future of the rail industry, particularly with regard to efficiency, safety and sustainability. The infoteam Software Group is also contributing its extensive knowledge in the areas of safety and security to support the rail industry in realising these important goals.

Gregor Schmitt, Director Market Industry and responsible for infoteam Software Group's membership in the VDB, comments: "Joining the VDB is an important step for our company. We are convinced that our innovative software solutions will make a significant contribution to digitalisation and increased efficiency in the rail industry. The collaboration with other leading companies and the opportunity to participate in pioneering projects opens up new perspectives and opportunities for us and our customers."

Shaping the future of the railway industry together

The VDB is also delighted with the new addition. Sarah Stark, Managing Director of the VDB, explains: "We warmly welcome the infoteam Software Group to our association. infoteam's expertise and innovative strength will be a valuable asset to our community. Together, we can shape the future of the railway industry and drive forward sustainable, digital solutions. The topics of safety and security in particular play a decisive role in this."

Membership of the VDB is an important step for infoteam Software Group to further strengthen its position in the railway industry and offer its customers even more powerful and future-oriented solutions. This underlines the company's commitment to actively driving forward the digitalisation of the rail industry and promoting sustainable innovation.

About infoteam Software Group

infoteam Software Group has been implementing unique software solutions for their customers in the industry, infrastructure, life science and public service markets for more than 40 years. Its core business comprises the partial and total development of control and embedded software, middleware and application software – agile, modern and in line with the latest security requirements.

Special areas of expertise include normatively regulated software for use in medical and laboratory equipment (IVDR, MDR, FDA, ISO 13485, IEC 62304, etc.) as well as functionally safe software at the highest safety level (IEC 61508, EN 50128, etc.). The service portfolio is well rounded as a result of many years of experience in data analysis, AI and machine learning.

infoteam Software Group employs more than 300 people and has offices and subsidiaries in Germany, the Czech Republic, Switzerland and Greece. The parent company, infoteam Software AG, is headquartered in Bubenreuth in the Bavarian metropole region Nuremberg, Germany.
